We are PolyCore's Largest Distributor!

PolyCORE

ALUMINUM EXTRUSION TECHNOLOGY

Polycore is the only solid synthetic company that is vertically integrated, whereas they extrude, paint, fabricate, and distribute the Polycore shutter.

All of the rails, stiles, and louvers are reinforced with an aluminum core. In the fabrication process the rail and stile are screwed together with two 3/16" X 3" self tapping screws in each corner of the panels. These corners prevent the panels from racking, thus creating the strongest panels in the industry today.
